

How to Get into

# The Best Business on Earth

“Here I had the greatest teacher I ever had in my life.”

—Liu-Jay Lam, CPA

Why is it that superinvestors like Warren Buffett can make one million times more money than others? Do they have more than 24 hours a day? Are they 100 times smarter than us? No. The secrets are:

1. They picked the right profession, that is to buy and own the most profitable businesses and allocate capital to where they can get the best return. The key is to focus your time and energy on activities with the highest payoff. (Tip: Plunge into the investment business that Warren Buffett got into.)
2. It's not the mind but how you use your mind that matters. Your mental habits can produce an amazing difference. You need to re-examine and restructure the ways you use your mind. (And we can help.)
3. The fastest way to wealth is to buy the proven system developed by proven superinvestors. Reinventing the wheel from scratch by reading all the books on your own takes too many precious years of your life.
4. Don't look down on sales career. You have to learn how to sell yourself or your services, even to get a job. Without sales, you don't have a business. The key is to deliver more value and charge less.
5. All paid jobs absorb and degrade the mind. And they fire you in the end after burning you 401K.
6. Research shows success depends on how early you jump into the pool and start your own business. Surviving on your own sharpens your mind and brings lifelong benefits you won't see for a few years.

We believe in your potential. Do you believe yourself? Would you like to give yourself a better chance by restructuring the financial strategies of your family and your business?
